### 1 Cross Entropy Loss Gradient

Let  $h(x_i) = s(w \cdot x_i)$ . Then

$$L = (-1) \cdot \sum_{i=1}^n y_i \log(s(w \cdot x_i)) + (1 - y_i) \log(1 - s(w \cdot x_i))$$

$$\nabla_w L = \nabla_w \left( (-1) \sum_{i=1}^n y_i \log(s(w \cdot x_i)) + (1 - y_i) \log(1 - s(w \cdot x_i)) \right)$$

Applying chain rule,

$$\nabla_w L = (-1) \sum_{i=1}^n y_i \left( \left( \frac{\partial}{\partial w} (\log(s(w \cdot x_i))) \right) \cdot \frac{\partial}{\partial w} (w \cdot x_i) \right) + \left( (1 - y_i) \frac{\partial}{\partial w} (\log(1 - s(w \cdot x_i))) \cdot \frac{\partial}{\partial w} (w \cdot x_i) \right)$$

Using the relationship  $\frac{\partial \log(s(w \cdot x_i))}{\partial w} = 1 - s(w \cdot x_i)$  and  $\frac{\partial \log(1 - s(w \cdot x_i))}{\partial w} = -s(w \cdot x_i)$ ,

$$\nabla_w L = (-1) \sum_{i=1}^n (y_i(1 - s(w \cdot x_i))(x_i) + (1 - y_i)(-s(w \cdot x_i))(x_i))$$

$$\nabla_w L = (-1) \sum_{i=1}^n ((x_i)(y_i - s(w \cdot x_i)(y_i)) + (x_i)(-s(w \cdot x_i) + s(w \cdot x_i)(y_i)))$$

$$\nabla_w L = (-1) \sum_{i=1}^n x_i(y_i - s(w \cdot x_i)(y_i) - s(w \cdot x_i) + s(w \cdot x_i)(y_i))$$

Finally,

$$\nabla_w L = \sum_{i=1}^n x_i(s(w \cdot x_i) - y_i) = \sum_{i=1}^n x_i(h(x_i) - y_i)$$

## 2 Einsum notation

### Matrix-vector multiplication

$$C_{j,k} = \sum_i A_{ijk} b_i$$

Einsum:  $ijk, i \rightarrow jk$

$$C_j = \sum_{i,k} A_{ijk} b_{ik}$$

Einsum:  $ijk, ik \rightarrow j$

### Sum over dimensions

$$A_{ik} = \sum_{j,l} A_{ijkl}$$

Einsum:  $ijkl \rightarrow ik$

$$A_{ki} = \sum_{j,l} A_{ijkl}$$

Einsum:  $ijkl \rightarrow ki$

$$C_i = \sum_{j,k} A_{ijk} A_{ijk}$$

Einsum:  $ijk, ijk \rightarrow i$

$$C = x^\top A x$$

Einsum: ?

## 3 Tensor broadcasting

- (3, 1, 2, 3) and (5, 3) are not broadcastable.
  - Fill smaller tensor from the left: (1, 1, 5, 3)
  - The sizes in the third dimension (2 and 5) are incompatible.
- (3, 2, 1, 3, 4) and (5, 3, 4) are broadcastable.
  - Fill smaller tensor from the left: (1, 1, 5, 3, 4)
  - The sizes in the third dimension (1 and 5) are compatible.
  - (1, 1, 5, 3, 4) is copied till its shape is (3, 2, 5, 3, 4).
- (3, 2, 1, 3, 4) and (5, 1, 4) are broadcastable.
  - Fill smaller tensor from the left: (1, 1, 5, 1, 4)
  - The sizes in the third dimension (1 and 5) are compatible.
  - The sizes in the fourth dimension (3 and 1) are compatible

- (1, 1, 5, 1, 4) is copied till its shape is (3, 2, 5, 3, 4).
- (3, 2, 1, 3, 2) and (5, 3, 1) are broadcastable.
    - Fill smaller tensor from the left: (1, 1, 5, 3, 1)
    - The sizes in the third dimension (1 and 5) are compatible.
    - The sizes in the fifth dimension (2 and 1) are compatible
    - (1, 1, 5, 3, 1) is copied till its shape is (3, 2, 5, 3, 2).
  - (3, 2, 1, 3, 2) and (1, 3, 1, 2) are broadcastable.
    - Fill smaller tensor from the left: (1, 1, 3, 1, 2)
    - The sizes in the third dimension (1 and 3) are compatible.
    - The sizes in the fourth dimension (3 and 1) are compatible.
    - (1, 1, 3, 1, 2) is copied till its shape is (3, 2, 3, 3, 2).
  - (7, 1) and (7) are broadcastable.
    - Fill smaller tensor from the left: (1, 7)
    - The sizes in the first dimension (7 and 1) are compatible.
    - The sizes in the second dimension (1 and 7) are compatible.
    - (1, 7) is copied till its shape is (7, 7).
